EXPERIENCE

Librarian for Digital Academic Strategies, Worcester Polytechnic Institute, Worcester, MA | 2018–present

- Support students, faculty, and researchers in planning digital projects and integrating digital scholarship into projects and the curriculum
- Lead open education initiative, through conducting outreach, developing partnerships, and planning programming and support services
- Serve as chair for Web Strategies Committee, charged with developing the Gordon Library's overall web strategy across multiple platforms
- Serve as administrator for library systems, including Digital Commons, Confluence, and Alma
- Develop and lead pilot project to develop scholarly profiles and archive publications for faculty
- Provide education and support in the areas of copyright, scholarly publishing, and open access
- Participate in and contribute to library and WPI committees and initiatives

Open Access Specialist, Digital Scholarship Services, Boston University, Boston, MA | 2016–2018

- Led BU Libraries' efforts to implement researcher information system Symplectic Elements in collaboration with Provost's Office and Information Systems & Technology
- Provided ongoing user support for publication profile curation, metadata quality, and open access article deposits to the institutional repository
- Established workflows and processes to encourage compliance with open access policy
- Coordinated outreach events and programming to encourage community conversation on open access issues, including Open Access Week, OpenCon Boston, Open Meetup series, and open textbook workshops
- Assisted with digital scholarship workshops/training series, acquiring knowledge of digital scholarship technologies in support of departmental needs
- Served as resource for open access and author rights questions arising in the course of digitization, digital publishing, and digital scholarship efforts
- Served on planning committee for Teaching with Technology Festival

Research Data Manager Intern, Harvard Medical School, Boston, MA | 2016

- Conducted outreach interviews with researchers to identify data management needs
- Created database for storing interview data and established data entry workflows
- Prepared best practice recommendations and online presence for data management services

Digital Contractor, Digital Services, Boston Public Library, Boston, MA | 2015–2016

- Created MODS metadata records for photographic collections in Digital Commonwealth
- Implemented metadata standards to improve discoverability of digital collections

Thesis Processor, Massachusetts Institute of Technology, Cambridge, MA | 2015–2016

- Administered processing workflow for print and electronic theses
- Assisted with inventory control and preservation tasks for archival digitization projects

Project Assistant, Harvard University Libraries, Cambridge, MA | 2015

- Managed collection of journal subscription data from Aleph ILS in support of research study
- Executed data cleaning techniques to ensure quality of data sets
- Liaised with electronic resources librarians to collect electronic journal subscription data

Cataloging Intern, American Archive of Public Broadcasting/WGBH, Boston, MA | 2015

- Created PBCore metadata records to improve discoverability of moving image/audio assets

Production Coordinator, Deerfield Academy Communications Office, Deerfield, MA | 2010–2014

- Coordinated workflows, schedules, and resources for communications projects
- Improved departmental productivity through implementation of project management system
- Created and maintained project documentation to ensure alignment to strategic objectives
- Served as project manager for website redesign using WordPress CMS, improving the Academy's web presence and user experience
